Hello, I'm Dr Lindsey Crockett, senior partner at Peninsula Practise, here to give you an update on Covid-related services.

Firstly, please may I ask anyone coming to the surgery to continue to wear face masks. This is for the benefit of our staff and your fellow patients, and helps prevent spread infection. We're seeing a lot of COVID affecting very many patients but also staff, and minimising the risks of this ensures that we can continue to provide a good service.

We're getting the vaccines delivered now, and in the next few weeks Covid clinics for the spring boosters, for those over 75 and others who are eligible, will be available. Our website will give details of when these clinics are. We're already vaccinating all our residents in our nursing and care homes, and by the end of next week, we will have completed all our eligible housebound patients.

Thank you for your patience and understanding that when we have significant staff sickness, due to mainly COVID, we do have to run an urgent only service. But in the main, we've been able to maintain a good normal service. If you do not agree, please do let us know by contacting our patient liaison lead, Sarah Fiddes, at our surgery. This way we can work together to improve our service wherever we can.

Thank you.
